System Engineer Infosys LTD

12/2019 - 01/2021

Bengaluru

Achievements/Tasks

- I Was trained in Python ,DBMS and basics of Web development during my training period and worked in python and web related projects.

RECENT PERSONAL PROJECTS

Portfolio Website

- I created my portfolio website to showcase my professional work and projects. People also can get my source code of some of my projects through this website.
- Languages and tools used:
 - * HTML, CSS ,Javascript in the front-end
 - * Python and Flask in the back-end
- Project Link:

Password Checker

- This project helps people to check if their password is leaked or compromised.
- People can avoid creating or using weak passwords that can be easily hacked using this module.
- People can also see how many times their passwords are appeared in repository of leaked passwords.
- This is created using Python and Pawn API.
- Project Link:
- <https://github.com/skgitbhat/Password-Checker/blob/main/passcheck.py>

Email Automation

- Using this project one can automate email sending process.
- This Python Module sends email without opening clients' side apps or websites like gmail or yahoo according to users' or service provider's requirements.
- One can also import this module into their existing project to automate their email sending process.
- I have used this module in my portfolio website to send an email to me whenever someone contacts me through my website.
- this project is built using python and smtp libraries.
- Project link:
- https://github.com/skgitbhat/Email-Automation/blob/main/auto_email.py
